

LETS GEL KIT™ Convenience Pack

Compounding instructions to make 100 mL gel

Article Number: 806893 | NDC: 51552-1536-01

Contents of LETS GEL KIT™ Convenience Pack

• LETS Powders for Gel		1 ea.
- Lidocaine Hydrochloride USP	4 g	
- Epinephrine Bitartrate USP	0.18 g	
- Tetracaine Hydrochloride USP	0.5 g	
- Sodium Metabisulfite NF	0.075 g	
• SuturaGel™ Methylcellulose Base (86 g)		1 ea.
• Press-In Bottle Adapter (28 mm)		1 ea.
• Syringes, Amber, Topical 3 mL with Caps		33 ea.

To prepare the LETS GEL KIT™ you will need:

- Purified Water USP, 10 mL (not included)
- 25 mL Beaker or larger (not included)
- Spatula or Glass Stirring Rod (not included)

Method of Preparation

- Loosen the contents of each LETS Powder container by gently tapping to dislodge powder that may be adhering to cap
- Empty LETS Powders into beaker
- Add 10 mL Purified Water USP into beaker and dissolve all powders to a clear solution
- Rinse each LETS container with LETS solution to dissolve any remaining powder residue that may be adhering to interior of container
- Pour contents of beaker into SuturaGel™ in 120 mL amber graduated gel container
- Stir with spatula, glass stir rod and/or shake well to ensure homogeneity
- Insert press-in-bottle adapter
- Using 3 mL amber syringes, draw out desired dose and cap
- Label appropriately
